Dear Sir,

Re grant of about Rs 15,000/- for improvement works in Srirangapatna Town -

---

With reference to your D O Letter No L 3275 dated 27-9-48 on the above subject, I write to state that the President, Town Municipal Council, Srirangapatna was requested to submit comprehensive proposals supported by an appropriate resolution of the Council and the connected estimates if any, for Town improvement and water supply grants for the year 47-48, but he replied on 5-7-48 that the subject would be placed before the Municipal Council at their special meeting proposed to be convened on 21-7-48 and proposals would be submitted since no proposals as promised by him, were received from him, so far, he has been reminded this day to submit comprehensive proposals supported by appropriate resolutions of the Municipal Council and the connected estimates On receipt of the same, definite proposals will be submitted to Government for necessary sanction

Yours sincerly,

Report to accompany the estimate for improvement of water supply to Seringapatam

The present system of water supply to the town is given by lifting water from the Cauvery river and pumping it through a pressure filter on to an overhead tank and then distributing the same through distribution mains

There is a 15 H p and 10 H p pump unit capable of discharging 6000 & 4000 gms per hour respectively against a head of 100 ft The length of Rising main is 3218 ft and size is 3 inches there is one pressure filter 72" diameter with a capacity of 3500 gms per Hr. The main distribution line is 3" and runs for a length of 2476 ft after which it is reduced to various sizes from 2" to 3/4"

Such scarcity as felt in the town proper since the size of the distribution mains etc are not of regd size. The present population of the town is 9000. The growth of the town slow and there are no signs of its rapid impt also

The president, Town Municipal Council, Seringapatam, observed that the water supply to the town may be impd and a scheme for the same

we worked out
A Comprehensive Scheme providing for a 6" Rising main to meet the prospective population of 12000 at 15 gln per head, 3 addl filters of 72", 1 lakh gln R.C.C reservoir, Staff quarters, a 6", 4", and 3" distribution main and sub main was got up costing Rs 1,70,400/- The president Town Municipal council Srirangapatam, who was consulted said that the Municipality could not meet the cost of the Scheme to give immediate relief only, providing for the absolute minimum requirements

Hence the ~~proposed~~ present Scheme is got up This consists of retaining the existing 15" & 10 H.P units to force more water through a 6" Rising main instead of the existing 4" line An addl filter with an attached, store room is also provided. The existing 15000 gln Steel tank acts as a balancing tank to which the new rising main is linked The distribution is taken from the tank The 4" Rising main released is made used for the distn main and all the links and sub mains will be with 3" C.I line Extra length of 3" C.I pipe required to complete the sub mains etc, in the lanes where ever reqd and also to form a grid system is also provided as shown in plan with suitable controls By these imptS it will be possible to draw more water and give adequate water supply to all the parts of the town All the metrials reqd have been estimated in detail and the cost of the scheme comes to Rs 65300/-. The question of finance will have to be decided in consultation with the president, Town Municipal council Srirangapatam The Scheme may be sanctioned
